

Kolli Sai Rithvik

Enthusiastic Computer Science graduate specializing in Java development. Proficient in Java, Spring Boot, and MySQL, with hands-on experience from academic and personal projects. Skilled in building scalable backend systems and eager to contribute innovative solutions as part of a collaborative team.

PROJECTS

Financial Management Application [Java Backend]

- **Developed** a scalable Java-based backend system for a financial management application, using **Spring Boot** for RESTful APIs and **MySQL database**, improving data retrieval times for user accounts.
- **Optimized MySQL database performance** by implementing **indexing** and **query optimization**, reducing query execution times by **30%**.
- **Designed and executed API tests** using **Postman**, identifying and fixing key issues in the **RESTful services**, improving data integrity and reducing error rates by **20%**.
- **Managed version control** using **Git and GitHub**, facilitating smooth code updates and minimizing merge conflicts through effective branching strategies.

Credit Card Fraud Detection [Machine Learning]

- **Built** a credit card fraud detection system using the **Naive Bayes algorithm**, focusing on **data cleaning**, **feature extraction**, **model training**, and **testing**, improving fraud detection accuracy by **30%**.
- **Set up** a system to **monitor and flag suspicious transactions**, identifying **1,200 potential fraud** cases within **six months**.
- **Added an OTP (One-Time Password) verification system** through **Telegram BOT**, reducing unauthorized transactions by **25%** and improving security for genuine users.
- **Created** a workflow combining **OTP and facial verification** with **OpenCV**, improving transaction security by verifying user identity.
- **Verified users' identities** by comparing their images with a **secure database**, ensuring only authorized transactions were completed.
- **Tools used:** Naive Bayes algorithm, Python, OpenCV, Telegram BOT, Machine Learning, Secure Database, Feature Extraction.

SKILLS

Languages:

Java, Python

Tools & Technologies:

Spring Boot, Hibernate

HTML, JavaScript

Git, GitHub

REST API

MySQL

Other Skills:

Data Structures, Algorithms

Object-Oriented Programming
(OOPS)

Large-Scale System Design

Software Development, Agile

Communication, Collaboration,

Problem-solving, Analytical

EDUCATION

B.Tech. - Computer Science | 7.05

PES University | 2019-2023

CERTIFICATIONS

Certificate for completing AI
Tools workshop at Be10x.

DAC certificate in 2nd semester.
